Your applications

✓ **Manage with Health** 2

Manage

Manage your asset lifecycle, workflow, and business processes and integrate with other enterprise applications.

Health

Manage the health of your assets to increase asset availability and improve replacement planning.

✓ **Monitor** 3

Optimize operating performance by using AI-powered remote asset monitoring to obtain insights into failures.

✓ **Predict** 3

Predict and manage the likelihood of future failures by applying machine learning and data analytics.

✓ **Assist**

Use artificial intelligence and augmented reality to enable technicians to troubleshoot and repair equipment problems more efficiently.
