Introduction

- We are a Maximo business partner focused exclusively on Supply Chain & Procure to Pay (P2P) Optimization.
- We provide P2P assessments and integration products that connect you with your suppliers, vendors and contractors.
- Whether you do purchasing in Maximo or not
- **We are not just about the supply chain, but how the supply chain can serve the maintenance team better.**

By Integrating you Improve Maintenance Team Reliability Getting:

- **Visibility** – see the vendor catalog with real-time pricing, discounts, availability, delivery, and freight costs.
- **Control** – Place Order based on accurate and real-time information and get confirmations, changes, and Shipping notifications automatically.
- **Automation** – With all the data flowing electronically in a structured format, you can automate the entire process.

Our holistic approach, has three components:

1. cXML Integration Framework
